

RUSH POND  
T2 R6 W, Penobscot Co.  
U.S.G.S. Sherman, Me.

Fishes

Yellow perch  
Chain pickerel  
Hornpout (bullhead)

White sucker  
Yellowbelly sunfish

Physical Characteristics

Area - 243 acres

Maximum depth - 12 feet

Temperatures

Surface - 64° F.

12 feet - 64° F.

Suggested Management

The surface of Rush Pond is choked with pickerel-weed, arrowhead, water lilies, and rushes with the exception of the narrow channel near the west shore. The bottom of most of the pond is blanketed with a thick layer of organic sediment. Fish are not abundant in this habitat.

Rush Pond provides a small winter fishery for pickerel. This is probably the best management possible for this peculiar body of water.

No stocking is recommended.
